

## IN THE SPECIFICATION

Please amend the specification to read as follows.

The paragraph beginning at page 6, line 7:

FIG. 3 is an exploded view of door 204 and housing 202. Door 204 includes a cover 302, a bracket 304, a mounting frame 306, and a hinge pin 308. Cover 302 has a generally flat front surface 208, and is formed to fit within opening 205. Cover 302 mounts elastically to bracket 304. A biasing member 310 of bracket 304 biases cover 302 toward bracket 304, but allows cover 302 to move slightly away from bracket 304 responsive to an external force. Alignment posts (not visible in FIG. 3) on the back of cover 302 fit into alignment apertures 312 in bracket 304 to properly align ~~cover 302~~ cover 302 with bracket 304. Bracket 304 includes a pair of L-shaped hinge members 314 that are pivotally mounted to mounting frame 306 via hinge pin 308. Mounting frame 308 is fastened to the inside of housing 202 at opening 205, such that hinge pin 308 is positioned adjacent (below) opening 205, and bracket 304 pivots about hinge pin 308 through opening 205. Mounting frame 306 can be fastened to the inner surface of housing 202 by any convenient means (e.g., clips, screws, rivets, adhesive, etc.).
